

Concentration Task

Amended process

1. Flip five random image cards
2. Reveal five hidden words
3. Connect all five words to the current external task
4. Create a task-related creative piece

Creative engagement channels internal ideation towards external tasks.

Memory Task

1. Enter the information to remember
2. Assign each item to a puzzle piece
3. Hover over pieces to reveal the information
4. Complete the puzzle and recall the items

Aesthetic engagement supports memory retention without external reminders.

Persistent Task

1. Enter recurring responsibilities
2. Represent each task as a planet
3. Link each planet to a valued person or commitment
4. Complete the task and illuminate the planet
5. Optionally share progress or supportive messages

Relational meaning supports sustained routine task execution.

Long-term Tasks

Amended process

1. Select a long-term task
2. Break it into short-term sub-tasks
3. Complete one achievable step
4. Receive an immediate positive reward
5. Repeat until the long-term task is completed

Immediate rewards reduce procrastination and sustain progress towards long-term goals.

Priority Tasks

1. Select a meaningful role or persona
2. Enter an imaginative narrative scenario
3. Connect the priority task to the character's goal
4. Complete the task within the narrative

Meaningful narratives activate goal-directed energy and support task initiation without external authority.

Emotion Regulation

1. Identify current mood state
2. Select mood-contingent pathway
3. Positive mood: Connect, help, or share
Negative mood: Meditate or reflect
4. Return with an adaptive coping strategy

Adaptive coping supports self-regulation while preserving agency during cognitive fatigue.
